Comprehensive Literacy Software and Apps

Ghotit - A Comprehensive Literacy Software Suite

Ghotit Real Writer & Reader is a literacy support software for Windows/Mac that works with any application.

Ghotit Real Writer & Reader can also be used as a stand-alone text editor.

Ghotit Apps for iPad/Chromebook assist people that need additional writing and reading support.

Spelling, grammar, and punctuation correction

In the heart of Ghotit solutions is an intelligent algorithm that works similarly to a human-person assistant that reads the text the user wrote and offers the best corrections by understanding the text. By working this way, Ghotit can correct poorly written text.

Style & Clarity

For a text to be well-written, more than correct spelling, perfect grammar, and in place punctuation is needed. More than a rich vocabulary is required. Well-written texts include all the above but additional extras in Style & Clarity.

Ghotit Style corrections include:

Passive to active voice conversions – In many cases, active voice sentences are shorter, more straightforward, and clearer than passive voice ones. Therefore, whenever possible, choose the active voice mode. Ghotit converts passive text and makes sure that your text is written in an active voice.

Repeated words– Impressive texts use a rich vocabulary base; therefore, it is recommended to use synonyms and avoid repeating the same word. Ghotit identifies repeated words and offers alternatives.

Academic writing – Ghotit helps rephrase informal or slang texts into a formal style.

Tautology & Conciseness - Lengthy texts and clichés lack clarify and focus. Ghotit helps to rephrase the text and improve its conciseness.

Banned words – Ghotit identifies words that are not allowed to be used.

Word Prediction

Ghotit Word Prediction helps people to write text quickly and correctly. Writers with typing issues and phonetic-based misspellings boost their productivity using Ghotit Word Prediction. The technology successfully predicts intended words. Corrections are offered instantly with the first typed letters of each word, even when the spellings of the word's first letters are incorrect.

Dictation

Ghotit dictation lets you use speech-to-text with almost any application using a microphone. It's a quick and easy way to get your thoughts out, create drafts or outlines, and capture notes.
◯ Reading Assistance 📶

Reading problems can take many shapes and forms. Some people struggle reading a complete document, while others have a problem reading a single word. Many people can read a complete sentence but stumble reading words embedded in an image. For some readers marking the words that will be read in a sentence helps them, while others need a read-out-loud definition dictionary. Reading assistance can take many shapes and forms, and Ghotit supports all of them.

◯ OCR 📶

For people with writing problems copying text can be a real bummer.
Ghotit OCR makes it easy to copy text, for example, from a PDF file or a website image.

◯ Teaching Support 📶

Ghotit solution helps with literacy teaching and progress tracking. With Ghotit, you can present Parts of Speech and Syllables and track the user's reading and writing performance.

📶 -NO need for Internet connection
